Video editor and social media manager creating educational YouTube videos and short-form social content. Combines post-production and publishing experience with web development and AI-assisted tools for creative workflows.

Experience

Video Editor & Social Media Manager

Work Smart Tutorials | 2024 - Present

- Edited 50+ short-form videos and 4+ long-form educational productions for YouTube and Instagram.
- Contributed to content with an estimated cumulative reach of 500K+, with one video reaching 120K views.
- Handled footage selection, pacing, captions, color correction and grading, audio cleanup, sound design, and platform exports.
- Manage social media publishing schedules and coordinate content revisions for YouTube and Instagram.

Co-Founder & Creative Operations

ZNS Nexus | Sep 2025 - Present

- Coordinate creative production, project planning, assets, requirements, and client-facing delivery for an early-stage service agency.
- Build reusable web applications and AI-assisted internal workflows using React, Next.js, and TypeScript.

Selected projects

CutLab Studio: Designed a production management platform for video editors and creative teams, bringing project tracking, versioned deliverables, client feedback, and approvals into one workflow. Built with React, Next.js, TypeScript, and Convex.

Planora: Built an open-source, self-hostable product management platform combining roadmaps, changelogs, and user feedback.

Syllora: Built an AI-assisted learning platform that turns generated roadmaps, guides, and source materials into structured learning with embedded resources and task tracking.

Skills

Editing: Long-form and short-form editing, narrative pacing, captions, color grading, audio cleanup, sound design, thumbnail design, revision management

Social media: YouTube and Instagram publishing, content scheduling

Creative tools: DaVinci Resolve, Adobe Premiere Pro, Photoshop, Lightroom, OBS Studio

Development: React, Next.js, TypeScript, JavaScript, Convex, Supabase, Git, GitHub

AI and automation: OpenAI API, prompt engineering, LLM workflows, Make, Zapier
